

EAGLE DOCUMENTS DONATION BY DAVE MILLHOUSER

Dave Millhouser provided the following information about his donation:

“Thought you guys might enjoy this... the brochure is the first one for Model 10 circa 1979. The reflection in the stainless bumper on cover is my legs (a photographer’s boo-boo), the Plump American driving through the bus wash and the finger on the switch on dash...all me. We could not afford models....

We almost lost the demo to a rising tide when taking the beauty shot...and since I was driver... my career might have been a LOT shorter. The bus pictured was one of two Model 10 prototypes, one with 8V71, and this one with 6V92 (both manual transmissions). Right after these photos were taken they sent me on a nationwide tour to all the Trailways carriers to show the new bus... on the road about 2 months.”
